## Testing RMarkdown and Github

The *code chunk* below performs the following:

-installs necessary libraries -presents a table with selected details of the 10 Gentoo penguins with the **largest** body mass.

```
library(tidyverse)
library(knitr)
library(palmerpenguins)

#q2.2
penguins %>%
  select(species, island, bill_length_mm, body_mass_g) %>%
  filter(species == "Gentoo") %>%
  arrange(-body_mass_g) %>%
  slice_head(n = 10) %>%
  knitr::kable()
```

species	island	bill_length_mm	body_mass_g
Gentoo	Biscoe	49.2	6300
Gentoo	Biscoe	59.6	6050
Gentoo	Biscoe	51.1	6000
Gentoo	Biscoe	48.8	6000
Gentoo	Biscoe	45.2	5950
Gentoo	Biscoe	49.8	5950
Gentoo	Biscoe	48.4	5850
Gentoo	Biscoe	49.3	5850
Gentoo	Biscoe	55.1	5850
Gentoo	Biscoe	49.5	5800
